Project Manager (m/f/d)
Schnitzer Consulting Shanghai
 For the Shanghai location

Company

8 locations – 4 companies – more than 25 years of experience – over 55 employees and we continue growing...!

For more than 25 years the Schnitzer Group is engaged in the coordination and realization of technical projects, beginning from the first sketch to the implementation in ongoing series production. Our customers and partners in the automotive aerospace and other high-grow sectors of the high technology regularly rely on our interdisciplinary, international team. Our core product „Systemic Projectmanagement“ provides the framework for our further focus areas: quality management, supply chain management, process and development management as well as customer management.

Background

- Customer consulting and service from the product development and the optimal tool technology until SOP
- Engineering competences in the field of product development and process optimization as well as personnel qualification measures
- Skills in leading project teams at the interface between suppliers, development and project management
- Solid basic knowledge in the field tool making and manufacturing technologies
- Engaging communication skills internally and externally
- Know-how in the field automotive is an advantage
- Fluent in business English
- International focus – open-minded
- Commitment and readiness to travel
- Capacity for teamwork and assertiveness

Qualification

Technical training/course of technical studies or practical experience. Motivation and commitment to shape our company in an independent manner and to make a direct impact on its development.
